WHY CONTRACTORS CHOOSE EASYFLOOR®

LESS LAYOUT TIME. FEWER MISTAKES.
BETTER RESULTS.

EasyFloor® is a pre-engineered radiant floor heating system designed to simplify layout and improve consistency on the jobsite.

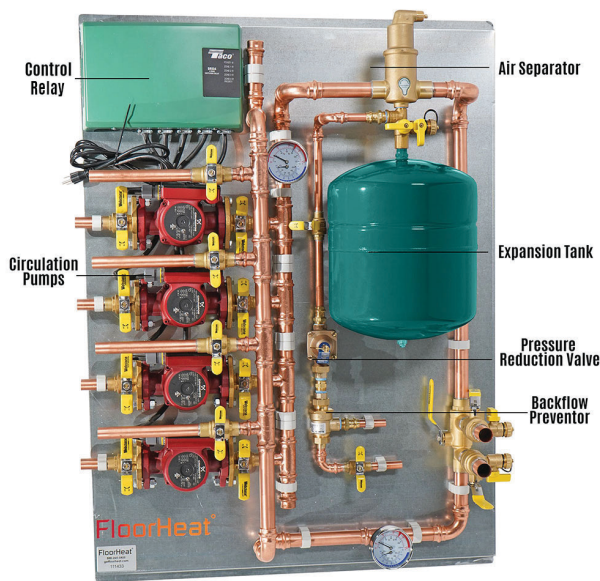

- **Modular grid system for fast layout**
- **Consistent 8" tubing spacing every time**
- **Clean installs for remodels or new construction**
- **Compatible with ½" PEX-AL-PEX tubing**
- **Proven performance with professional support**

CONTROL PANELS

DESIGNED TO WORK SEAMLESSLY WITH
EASYFLOOR® RADIANT SYSTEMS

FloorHeat control panels are designed to simplify boiler connections and zone control while delivering a clean, professional installation.

- **Factory-assembled and pressure-tested**
- **Available in 1–6 zone configurations**
- **Integrated pumps, relays, and safety components**
- **Clean layout for easier servicing**
- **Reduces install time and wiring complexity**

SYSTEM OVERVIEW

ONE SUPPLIER.
ONE SYSTEM.
PROFESSIONAL SUPPORT.

- **EasyFloor® Grid Modules**
- **PEX-AL-PEX Tubing**
- **Heat Transfer Plates**
- **Thermal Reflective Foil**
- **Hydronic Control Panels**

FloorHeat provides the core components needed for a reliable hydronic radiant installation.
